# Group Assignment 2 – Storefront in HTML

**Description**:
This assignment is to setup the storefront of our e-commerce site for selling electric vehicles.

**Approach / What I Did**:
We assigned different pages to our group members as the following:
Sean: FAQ, About
Xia: Login, systems, account
Saarth: Cart, payment
Josh: Home

**Issues and Resolutions:**

- Our had issues where we had a typo in the link and we ended up getting a Cannot GET /payment.html error. We fixed by finding out it was a lowercase/uppercase issue and change it to lowercase.

**Analysis**:
This assignment taught us how we can work as a team to implement an HTML webpage as an e-commerce website. This experience has game us more experience about the negation bar and the data field entry, which are crucial for an e-commerce page such as ours.
